- I'm Detail Oriented and Attentive

🛠 Technical Skills

HTML • CSS • JAVASCRIPT • MongoDB • Express • React.js • NODE.JS
React-Redux

📁 Projects

Caratlane Clone, This Project was in collaboration . 📄

03/2022

I got my first Project on construct week at MASAI SCHOOL. which was a collaborative Project of 5 members. I'm Leading our team. there were 4 days to complete it. we were doing daily project scrum in the morning. whatever issue any person faces will be solved by the day.

most skills used by a member are JAVASCRIPT, HTML, and CSS.

I did the landing page. there was a product page, with lots of functionality like add to cart, sort orders by pricing, payment, login, and logout.

so this is my collaborative project. and we are complete it.

Revv.co.in clone, Individual Project 📄

07/2022 – 07/2022

This website is not entirely built on React Js within 4 days.

I've mostly focused on UI, User Flow, log in, and SignUp Functionality

skills used in place are ReactJs, and API, for UI I used ChakraUI. for fetching the data using Axios.

GitHub link 📄

Tmetric Clone, Group Project 📄

09/2022 – 10/2022

Tmetric is a website where you can manage your time and task in this project mainly working on login signUp with frontend and backend. for the backend, I am using nodejs and Express mongoose MongoDB servers. Server API also has been deployed on Heroku
